

pallucco

Da scultura monumentale delle tribù native nordamericane, a lampada di design perfetta per arredare gli spazi più eclettici. Come suggerisce il suo nome, Totem è la rappresentazione del gusto e delle necessità funzionali di chi la acquista. Versatile e giocosa, cambia al mutare delle tendenze e dei desideri del cliente, grazie a una fascia magnetica che riveste il profilo esterno in alluminio su cui si applicano elementi decorativi, personalizzabili nelle finiture. Questi danno vita a motivi sempre diversi e a effetti luminosi unici, riflettendo la luce proveniente da una strip LED applicata su entrambi i lati della lampada.

A native North American monumental sculpture turned into a design lamp, perfect to decorate the most eclectic spaces. Totem, as its name suggests, is the representation of the taste and functional needs of those who buy it. Versatile and playful, it has an ever-changing nature, as it keeps up with trends and follows the customer's desires. Thanks to a magnetic bar attached to the aluminium profile, it is possible to play with decorative elements, also available in custom finishes. These create various patterns and unique lighting effects, reflecting the light coming from a LED strip on both sides of the lamp.
